

### <File Filter Bar>

Consist of Category Combobox and Textbox.

To open, Long-Click Sort Combo.

To close, Long-Click Sort Combo or Long-Click "X" Button on File Filter Bar.

(Simple Click "X" Button clears TextBox)

To clear Category, Long-Click "Type(Category) ComboBox" .

- \* Files directly under current folder filtered.

- \* Wild card '\*' cannot used.

- \* Not affect on Video or Music Player playlist. So when filtering, current playback file may not be shown in file list.

- \* When move to other folder, filtering is reset and filter-bar disappears.

### <Customize Filter using Type\_filter.txt>

Type\_filter.txt is in the App folder 'Android/Data/myCom.Explorer999/files' in internal drive(same as location of Shortcut.txt. For quick access, select "Setting Folder" in Favorite Combo).

After editing Type\_filter.txt, need to restart App.

1) Limit by Extensions.

(format 1)

<item string shown in combo>, <Extension list(separated with Comma)>

Ex.)

Pic, JPG, PNG

2) Limit file to those Filename includes specified string using Curly brackets.

(format 2)

<item string shown in combo>, {<string list(separated with Comma)>}
